

# Product datasheet for CS807615

### **Tissue FFPE Sections, Cartilage**

#### **Product data:**

| Product Type:   | FFPE Sections                       |
|---|-------------------------------------|
| Disease State:  | Normal                              |
| Diagnosis Category:                                     | Normal                              |
| Tissue:   | Cartilage                           |
| Frozen Sample ID:                                       | PA12F44BBB                          |
| Case ID:  | CU000006247                         |
| Tissue of Origin:                                       | Cartilage                           |
| Site of Finding:  | Cartilage                           |
| Appearance:   | R                                   |
| Sample Diagnosis (from<br>Pathology Verification):      | Within normal limits                |
| Normal:   | 100%                                |
| Lesional:   | 0%                                  |
| Tumor:  | 0%                                  |
| Tumor Hypo/Acellular<br>Stroma:                         | 0%                                  |
| Tumor Hypercellular<br>Stroma:                          | 0%                                  |
| Necrosis:   | 0%                                  |
| Pathology Verification<br>notes from H&E review:        | 20% chondrocytes, 80% matrix        |
| CASE Diagnosis (from<br>medical center path<br>report): | Atherosclerosis                     |
| Age:  | 87                                  |
| Gender:   | Female                              |
| Storage:  | Store FFPE tissue sections at +4°C. |

#### OriGene Technologies, Inc.
