| Product Type:                                           | FFPE Sections                         |
|---------------------------------------------------------|---------------------------------------|
| Disease State:                                          | Other Disease                         |
|                                                         |                                       |
| Diagnosis Category:                                     | Inflammatory Bowel Disease (IBD)      |
| Tissue:                                                 | Rectum                                |
| Frozen Sample ID:                                       | PA15476A30                            |
| Case ID:                                                | CU000006575                           |
| Tissue of Origin:                                       | Rectum                                |
| Site of Finding:                                        | Rectum                                |
| Appearance:                                             | L                                     |
| Sample Diagnosis (from<br>Pathology Verification):      | Colitis, active                       |
| Normal:                                                 | 0%                                    |
| Lesional:                                               | 100%                                  |
| Tumor:                                                  | 0%                                    |
| Tumor Hypo/Acellular<br>Stroma:                         | 0%                                    |
| Tumor Hypercellular<br>Stroma:                          | 0%                                    |
| Necrosis:                                               | 0%                                    |
| Pathology Verification<br>notes from H&E review:        | 15% mucosa, 20% submucosa, 65% muscle |
| CASE Diagnosis (from<br>medical center path<br>report): | Colitis, active                       |
| Age:                                                    | 21                                    |
| Gender:                                                 | Male                                  |
| Storage:                                                | Store FFPE tissue sections at +4°C.   |

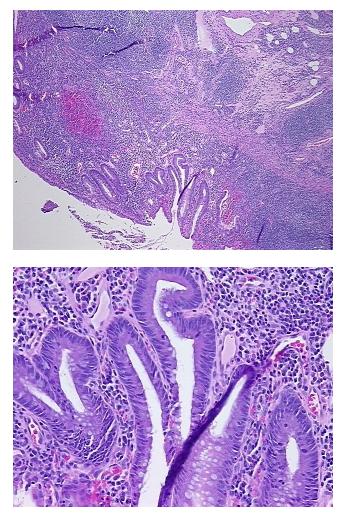

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

Stability:

All FFPE tissue sections are stable for 1 year from date of purchase.
