A Human Cancer Survey real time PCR Gene Expression used in real-time PCR. The beta-actin contents in the 96 human cDNAs were detected using SYBR Green I protocol and performed on a PE7700.

Fluorescence reading - cycle number

A Human Cancer Survey real time PCR Gene Expression panel was used in SYBR Green I based real time PCR. The expression profile of human Survivin gene (NM_001168) was detected using SYBR Green I protocol and performed on a PE7700.

Normalized relative expression among 12 samples from each tissue group
