Product Type:	Recombinant Proteins
Description:	VEGFR-1 / Flt-1 human recombinant protein, 20 µg
Species:	Human
Expression Host:	Insect
Expression cDNA Clone or AA Sequence:	SKLKDPELSL KGTQHIMQAG QTLHLQCRGE AAHKWSLPEM VSKESERLSI TKSACGRNGK QFCSTLTLNT AQANHTGFYS CKYLAVPTSK KKETESAIYI FISDTGRPFV EMYSEIPEII HMTEGRELVI PCRVTSPNIT VTLKKFPLDT LIPDGKRIIW DSRKGFIISN ATYKEIGLLT CEATVNGHLY KTNYLTHRQT NTIIDVQIST PRPVKLLRGH TLVLNCTATT PLNTRVQMTW SYPDEKNKRA SVRRIDQSN SHANIFYSVL TIDKMQNKDK GLYTCRVRSG PSFKSVNTSV HIYDKAFITV KHRKQQVLET VAGKRSYRLS MKVKAFPSPE VVWLKDGLPA TEKSARYLTR GYSLIIKDVT EEDAGNYTIL LSIKQSNVFK NLTATLIVNV KPQIYEKAVS SFPDPALYPL GSRQILTCTA YGIPQPTIKW FWHPCNHNHS EARCDFCSNN EESFILDADS NMGNRIESIT QRMAIIEGKN KMASTLVVAD SRISGIYICI ASNKVGTVGR NISFYITDVP NGFHVNLEKM PTEGEDLKLS CTVNKFLYRD VTWILLRTVN NRTMHYSISK QKMAITKEHS ITLNLTIMNV SLQDSGTYAC RARNVYTGEE ILQKKEITIR GEHCNKKAVF SRISKFKSTR NDCTTQSNVK H
Predicted MW:	96 kDa
Purity:	>95% pure by SDS-PAGE and visualised by silver stain
Buffer:	Presentation State: Purified State: Lyophilized protein Buffer System: PBS Stabilizer: None
Bioactivity:	Biological: The activity of sVEGFR-1 was determined by its ability to inhibit the VEGF-A-induced proliferation of HUVECs.
Endotoxin:	< 0.1 ng per µg of sVEGFR-1
Reconstitution Method:	Soluble in water and most aqueous buffers. The lyophilized sVEGFR-1 should be restored in PBS to a concentration not lower than 0.1 ng/ml.
Preparation:	Lyophilized protein

GRIGENE VEGFR-1 / Flt-1 Human Protein – DA3532X

Image:	Protein Description:	Recombinat Human soluble Vascular Endothelial Growth Factor Receptor-1 (sVEGFR-1) is the naturally occurring form and was cloned from total RNA of Human Umbilical Vein Endothelial cells.
Storage:Store lyophilized at 2-8°C for 6 months or at -20°C long term. After reconstitution store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C long term. Avoid repeated freezing and thawing.Stability:Shelf life: one year from despatch.RefSeq:NP 001153392Locus ID:2321UniProt ID:P17948Cytogenetics:13q12.3Symonyms:VEGFR1, FLT1, FLT, FRT, VEGF Receptor 1Summary:This gene encodes a member of the vascular endothelial growth factor receptor (VEGFR) family. VEGFR family members are receptor tyrosine kinases (RTKs) which contain an extracellular ligand-binding region with seven immunoglobulin (lg)-like domains, a transmembrane segment, and a tyrosine kinase (TK) domain within the cytoplasmic domain. 		approximately 96 kDa. The soluble receptor protein contsists of the first 6 extracellular domains (Met1-His688) containing the unique 31 amino acids residues at the C-terminus. Result by N-terminal sequencing: SKLKD Length: 661 amino acids.
After reconstitution store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C long term. Avoid repeated freezing and thaving.Stability:Shelf life: one year from despatch.RefSeq:NP 001153392Locus ID:2321UniProt ID:P17948Cytogenetics:13q12.3Synonyms:VEGFR1, FLT1, FLT, FRT, VEGF Receptor 1Summary:This gene encodes a member of the vascular endothelial growth factor receptor (VEGFR) family. VEGFR family members are receptor tyrosine kinases (RTKs) which contain an extracellular ligand-binding region with seven immunoglobulin (lg)-like domains, a transmembrane segment, and a tyrosine kinase (TK) domain within the cytoplasmic domain. This protein binds to VEGFR-8 and placental growth factor and plays an important role in angiogenesis and vasculogenesis. Expression of this receptor and plays an important role in angiogenesis and vasculogenesis. Expression of this receptor and plays an important role in angiogenesis and vasculogenesis. Expression of this receptor and plays an important 		
RefSeq:NP 001153392Locus ID:2321UniProt ID:P17948Cytogenetics:13q12.3Synonyms:VEGFR1, FLT1, FLT, FRT, VEGF Receptor 1Summary:This gene encodes a member of the vascular endothelial growth factor receptor (VEGFR) family. VEGFR family members are receptor tyrosine kinases (RTKs) which contain an extracellular ligand-binding region with seven immunoglobulin (lg)-like domains, a transmembrane segment, and a tyrosine kinase (TK) domain within the cytoplasmic domain. This protein binds to VEGFR-A, VEGFR-B and placental growth factor and plays an important role in angiogenesis and vasculogenesis. Expression of this receptor is found in vascular endothelial cells, placental trophoblast cells and peripheral blood monocytes. Multiple transcript variants encoding different isoforms have been found for this gene. Isoforms. The soluble isoforms are associated with the onset of pre-eclampsia.[provided by RefSeq, May 2009]Protein Families:Druggable Genome, Protein Kinase, Secreted Protein	Storage:	After reconstitution store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C long term.
