

## Product datasheet for **DDX0190B-100**

### LAMP3 Mouse Monoclonal Antibody [Clone ID: 104G4]

#### Product data:

Product Type:	Primary Antibodies
Clone Name:	104G4
Applications:	FC, IHC
Recommend Dilution:	<b>Intracyto Flow cytometry, IHC</b>
Reactivity:	Human, Sheep
Host:	Mouse
Isotype:	IgG1
Clonality:	Monoclonal
Immunogen:	human DC-LAMP alkaline phosphatase fusion protein
Specificity:	human DC-LAMP (epitope in intracytoplasmic domain). <b>Species cross-reactivity:</b> sheep.
Formulation:	Label: Biotin State: 100 µg in 200µl / 50 µg in 100 µl PBS 50% glycerol
Concentration:	0.5 mg/ml
Conjugation:	Biotin
Gene Name:	lysosomal associated membrane protein 3
Database Link:	<a href="#">Entrez Gene 27074 Human</a>
Background:	<p>The dendritic cell lysosomal-associated membrane protein (DC-LAMP)/CD208 is a type I integral transmembrane glycoprotein mostly homologous to CD68, of about 45 kDa in mouse and 90 kDa in human (glycosylation), with a bipartite C-terminal structure divided by a serine/proline rich region, a transmembrane domain and a conserved tyrosine-based lysosomal targeting motif in its cytoplasmic tail. Initially cloned as a specific marker of human mature dendritic cells (DCs), DC-LAMP has been subsequently shown to be expressed in alveolar type II pneumocytes. In both cell types, the molecule is found in the limiting membrane of intracellular multi-lamellar bodies, known as MIIC (MHC class II compartments) in human mature DCs and as lung surfactant-containing lamellar bodies in type II pneumocytes. In the latter cell type, DC-LAMP expression is also detected at the cell surface. (<i>de Saint-Vis B et al, 1998 ; Immunity ; 9:325-336</i>)</p>
