| Product Type: | CRISPRa Kits                                                                                                                                                                                                                                                                                                  |
| Description:  | MGAT4C CRISPRa kit - CRISPR gene activation of human MGAT4 family member C                                                                                                                                                                                                                                    |
| Symbol:       | MGAT4C                                                                                                                                                                                                                                                                                                        |
| Components:   | GA108573G1, MGAT4C gRNA vector 1 in pCas-Guide-GFP-CRISPRa (GE100074)<br>GA108573G2, MGAT4C gRNA vector 2 in pCas-Guide-GFP-CRISPRa (GE100074)<br>GA108573G3, MGAT4C gRNA vector 3 in pCas-Guide-GFP-CRISPRa (GE100074)<br>1 CRISPRa-Enhancer vector, SKU GE100056<br>1 CRISPRa scramble vector, SKU GE100077 |
| UniProt ID:   | <u><a href="#">Q9UBM8</a></u>                                                                                                                                                                                                                                                                                 |
| Synonyms:     | GNTIVH; HGNT-IV-H                                                                                                                                                                                                                                                                                             |
| Format:       | 3 gRNAs (5ug each), 1 scramble ctrl (10ug) and 1 enhancer vector (10ug)                                                                                                                                                                                                                                       |
