| Product Type: | CRISPRa Kits                                                                                                                                                                                                                                                                                                                                                                          |
| Description:  | COL28A1 CRISPRa kit - CRISPR gene activation of human collagen type XXVIII alpha 1 chain                                                                                                                                                                                                                                                                                              |
| Symbol:       | COL28A1                                                                                                                                                                                                                                                                                                                                                                               |
| Components:   | GA117468G1, Collagen alpha 1(XXVIII) chain gRNA vector 1 in pCas-Guide-GFP-CRISPRa (GE100074)<br>GA117468G2, Collagen alpha 1(XXVIII) chain gRNA vector 2 in pCas-Guide-GFP-CRISPRa (GE100074)<br>GA117468G3, Collagen alpha 1(XXVIII) chain gRNA vector 3 in pCas-Guide-GFP-CRISPRa (GE100074)<br>1 CRISPRa-Enhancer vector, SKU GE100056<br>1 CRISPRa scramble vector, SKU GE100077 |
| UniProt ID:   | <a href="#">Q2UY09</a>                                                                                                                                                                                                                                                                                                                                                                |
| Synonyms:     | COL28                                                                                                                                                                                                                                                                                                                                                                                 |
| Format:       | 3 gRNAs (5ug each), 1 scramble ctrl (10ug) and 1 enhancer vector (10ug)                                                                                                                                                                                                                                                                                                               |
