| <b>Product Type:</b> | CRISPRa Kits                                                                                                                                                                                                                                                                                                           |
| <b>Description:</b>  | MALRD1 CRISPRa kit – CRISPR gene activation of human MAM and LDL receptor class A domain containing 1                                                                                                                                                                                                                  |
| <b>Symbol:</b>       | MALRD1                                                                                                                                                                                                                                                                                                                 |
| <b>Components:</b>   | GA117502G1, C10orf112 gRNA vector 1 in pCas-Guide-GFP-CRISPRa (GE100074)<br>GA117502G2, C10orf112 gRNA vector 2 in pCas-Guide-GFP-CRISPRa (GE100074)<br>GA117502G3, C10orf112 gRNA vector 3 in pCas-Guide-GFP-CRISPRa (GE100074)<br>1 CRISPRa-Enhancer vector, SKU GE100056<br>1 CRISPRa scramble vector, SKU GE100077 |
| <b>UniProt ID:</b>   | <u><a href="#">Q5VYJ5</a></u>                                                                                                                                                                                                                                                                                          |
| <b>Synonyms:</b>     | bA265G8.2; C10orf112; DIET1                                                                                                                                                                                                                                                                                            |
| <b>Format:</b>       | 3 gRNAs (5ug each), 1 scramble ctrl (10ug) and 1 enhancer vector (10ug)                                                                                                                                                                                                                                                |
