| Product Type: | CRISPRa Kits                                                                                                                                                                                                                                                                                                  |
| Description:  | Sec24a CRISPRa kit - CRISPR gene activation of mouse Sec24 related gene family, member A ( <i>S. cerevisiae</i> )                                                                                                                                                                                             |
| Symbol:       | Sec24a                                                                                                                                                                                                                                                                                                        |
| Components:   | GA210743G1, Sec24a gRNA vector 1 in pCas-Guide-GFP-CRISPRa (GE100074)<br>GA210743G2, Sec24a gRNA vector 2 in pCas-Guide-GFP-CRISPRa (GE100074)<br>GA210743G3, Sec24a gRNA vector 3 in pCas-Guide-GFP-CRISPRa (GE100074)<br>1 CRISPRa-Enhancer vector, SKU GE100056<br>1 CRISPRa scramble vector, SKU GE100077 |
| UniProt ID:   | <u>Q3U2P1</u>                                                                                                                                                                                                                                                                                                 |
| Format:       | 3 gRNAs (5ug each), 1 scramble ctrl (10ug) and 1 enhancer vector (10ug)                                                                                                                                                                                                                                       |
