| Product Type: | CRISPRa Kits                                                                                                                                                                                                                                                                                               |
| Description:  | IgLv2 CRISPRa kit - CRISPR gene activation of mouse immunoglobulin lambda variable 2                                                                                                                                                                                                                       |
| Symbol:       | IgLv2                                                                                                                                                                                                                                                                                                      |
| Components:   | GA212331G1, IgLv2 gRNA vector 1 in pCas-Guide-GFP-CRISPRa (GE100074)<br>GA212331G2, IgLv2 gRNA vector 2 in pCas-Guide-GFP-CRISPRa (GE100074)<br>GA212331G3, IgLv2 gRNA vector 3 in pCas-Guide-GFP-CRISPRa (GE100074)<br>1 CRISPRa-Enhancer vector, SKU GE100056<br>1 CRISPRa scramble vector, SKU GE100077 |
| Format:       | 3 gRNAs (5ug each), 1 scramble ctrl (10ug) and 1 enhancer vector (10ug)                                                                                                                                                                                                                                    |
