| <b>Product Type:</b> | CRISPRa Kits                                                                                                                                                                                                                                                                                                  |
| <b>Description:</b>  | Elmsan1 CRISPRa kit - CRISPR gene activation of mouse ELM2 and Myb/SANT-like domain containing 1                                                                                                                                                                                                              |
| <b>Symbol:</b>       | Mideas                                                                                                                                                                                                                                                                                                        |
| <b>Components:</b>   | GA214787G1, Mideas gRNA vector 1 in pCas-Guide-GFP-CRISPRa (GE100074)<br>GA214787G2, Mideas gRNA vector 2 in pCas-Guide-GFP-CRISPRa (GE100074)<br>GA214787G3, Mideas gRNA vector 3 in pCas-Guide-GFP-CRISPRa (GE100074)<br>1 CRISPRa-Enhancer vector, SKU GE100056<br>1 CRISPRa scramble vector, SKU GE100077 |
| <b>Synonyms:</b>     | 9430029N19Rik; C130039O16Rik; Gm260                                                                                                                                                                                                                                                                           |
| <b>Format:</b>       | 3 gRNAs (5ug each), 1 scramble ctrl (10ug) and 1 enhancer vector (10ug)                                                                                                                                                                                                                                       |
