| <b>Product Type:</b> | CRISPRa Kits                                                                                                                                                                                                                                                                                                  |
| <b>Description:</b>  | Gm7609 CRISPRa kit – CRISPR gene activation of mouse predicted pseudogene 7609                                                                                                                                                                                                                                |
| <b>Symbol:</b>       | Gm7609                                                                                                                                                                                                                                                                                                        |
| <b>Components:</b>   | GA218327G1, Gm7609 gRNA vector 1 in pCas-Guide-GFP-CRISPRa (GE100074)<br>GA218327G2, Gm7609 gRNA vector 2 in pCas-Guide-GFP-CRISPRa (GE100074)<br>GA218327G3, Gm7609 gRNA vector 3 in pCas-Guide-GFP-CRISPRa (GE100074)<br>1 CRISPRa-Enhancer vector, SKU GE100056<br>1 CRISPRa scramble vector, SKU GE100077 |
| <b>Synonyms:</b>     | EG665378                                                                                                                                                                                                                                                                                                      |
| <b>Format:</b>       | 3 gRNAs (5ug each), 1 scramble ctrl (10ug) and 1 enhancer vector (10ug)                                                                                                                                                                                                                                       |
