

## **Product datasheet for GE100071**

## pAAVS1-EF1a-tRFP-BSD-DNR CRISPR Vector

## **Product data:**

**Product Type:** CRISPR Vectors

**Function:** AAVS1 donor vector

Features: • Donor vector for targeted transgene insertion into human AAVS1 site

• Contains left and right AAVS1 homologous sequences (550 bp each side)

• Multiple cloning sites for transgene cloning, compatible for shuttling from the <u>TrueORF clones</u>

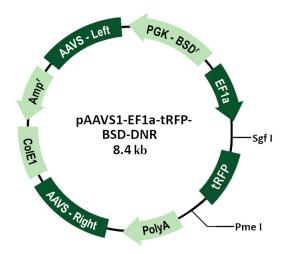

• The expression of the target gene will be under EF1a promoter, a constitutive promoter as an alternative of CMV promoter. the latter could be silenced in certain cellular environment

• Blasticidin mammalian selection under PGK promoter

Targeted insertion when cotransfected with pCas-Guide-AAVS1 (SKU GE100023)

**Disclaimer:** These products are manufactured and supplied by OriGene under license from ERS.
