

## Product datasheet for **KN200641RB**

### NNMT Human Gene Knockout Kit (CRISPR)

#### Product data:

Product Type:	Knockout Kits (CRISPR)
Format:	2 gRNA vectors, 1 RFP-BSD donor, 1 scramble control
Donor DNA:	RFP-BSD
Symbol:	NNMT
Locus ID:	4837
Components:	<b>KN200641G1</b> , NNMT gRNA vector 1 in pCas-Guide CRISPR vector (GE100002) <b>KN200641G2</b> , NNMT gRNA vector 2 in pCas-Guide CRISPR vector (GE100002) <b>KN200641RBD</b> , donor DNA containing left and right homologous arms and RFP-BSD functional cassette. <b>GE100003</b> , scramble sequence in pCas-Guide vector
Disclaimer:	These products are manufactured and supplied by OriGene under license from ERS. The kit is designed based on the best knowledge of CRISPR technology. The system has been functionally validated for knocking-in the cassette downstream the native promoter. The efficiency of the knock-out varies due to the nature of the biology and the complexity of the experimental process.
RefSeq:	<a href="#">NM_006169</a>
UniProt ID:	<a href="#">P40261</a>
Synonyms:	nicotinamide N-methyltransferase
Summary:	N-methylation is one method by which drug and other xenobiotic compounds are metabolized by the liver. This gene encodes the protein responsible for this enzymatic activity which uses S-adenosyl methionine as the methyl donor. [provided by RefSeq, Jul 2008]
