

## Product datasheet for KN207510BN

### Product datasireet for kinzu/5 lobin

**TLR9 Human Gene Knockout Kit (CRISPR)** 

### Product data:

**Product Type:** Knockout Kits (CRISPR)

**Format:** 2 gRNA vectors, 1 mBFP-Neo donor, 1 scramble control

**Donor DNA:** mBFP-Neo

Symbol: TLR9
Locus ID: 54106

**Components:** KN207510G1, TLR9 gRNA vector 1 in pCas-Guide CRISPR vector (GE100002)

**KN207510G2**, TLR9 gRNA vector 2 in pCas-Guide CRISPR vector (GE100002)

KN207510BND, donor DNA containing left and right homologous arms and mBFP-Neo

functional cassette.

GE100003, scramble sequence in pCas-Guide vector

**Disclaimer:** These products are manufactured and supplied by OriGene under license from ERS. The kit is

designed based on the best knowledge of CRISPR technology. The system has been functionally validated for knocking-in the cassette downstream the native promoter. The efficiency of the knock-out varies due to the nature of the biology and the complexity of the

experimental process.

RefSeq: <u>NM 017442</u>, <u>NM 138688</u>

UniProt ID: Q9NR96
Synonyms: CD289

**Summary:** The protein encoded by this gene is a member of the Toll-like receptor (TLR) family, which

plays a fundamental role in pathogen recognition and activation of innate immunity. TLRs are highly conserved from Drosophila to humans and share structural and functional similarities. They recognize pathogen-associated molecular patterns (PAMPs) that are expressed on infectious agents, and mediate the production of cytokines necessary for the development of effective immunity. Studies in mice and human indicate that this receptor mediates cellular response to unmethylated CpG dinucleotides in bacterial DNA to mount an innate immune

response. [provided by RefSeq, Aug 2017]
