Cytokeratin 8 (KRT8) Human Gene Knockout Kit (CRISPR)

Product data:

Product Type: Knockout Kits (CRISPR)

Format: 2 gRNA vectors, 1 Luciferase-Puro donor, 1 scramble control

Donor DNA: Luciferase-Puro Symbol: Cytokeratin 8

Locus ID: 3856

Components: KN209570G1, Cytokeratin 8 gRNA vector 1 in pCas-Guide CRISPR vector (GE100002)

KN209570G2, Cytokeratin 8 gRNA vector 2 in pCas-Guide CRISPR vector (GE100002)

KN209570LPD, donor DNA containing left and right homologous arms and Luciferase-Puro

functional cassette.

GE100003, scramble sequence in pCas-Guide vector

Disclaimer: These products are manufactured and supplied by OriGene under license from ERS. The kit is

designed based on the best knowledge of CRISPR technology. The system has been functionally validated for knocking-in the cassette downstream the native promoter. The efficiency of the knock-out varies due to the nature of the biology and the complexity of the

experimental process.

RefSeq: <u>NM 001256282</u>, <u>NM 001256293</u>, <u>NM 002273</u>, <u>NR 045962</u>

UniProt ID: <u>P05787</u>

Synonyms: CARD2; CK-8; CK8; CYK8; K2C8; K8; KO

Summary: This gene is a member of the type II keratin family clustered on the long arm of chromosome

12. Type I and type II keratins heteropolymerize to form intermediate-sized filaments in the cytoplasm of epithelial cells. The product of this gene typically dimerizes with keratin 18 to form an intermediate filament in simple single-layered epithelial cells. This protein plays a role in maintaining cellular structural integrity and also functions in signal transduction and cellular differentiation. Mutations in this gene cause cryptogenic cirrhosis. Alternatively spliced transcript variants have been found for this gene. [provided by RefSeq, Jan 2012]
