

Product datasheet for KN215079BN

ATG7 Human Gene Knockout Kit (CRISPR)

Product data:

Product Type: Knockout Kits (CRISPR)

Format: 2 gRNA vectors, 1 mBFP-Neo donor, 1 scramble control

Donor DNA: mBFP-Neo

ATG7 Symbol:

Locus ID: 10533

KN215079G1, ATG7 gRNA vector 1 in pCas-Guide CRISPR vector (GE100002) Components:

KN215079G2, ATG7 gRNA vector 2 in pCas-Guide CRISPR vector (GE100002)

KN215079BND, donor DNA containing left and right homologous arms and mBFP-Neo

functional cassette.

GE100003, scramble sequence in pCas-Guide vector

Disclaimer: These products are manufactured and supplied by OriGene under license from ERS. The kit is

> designed based on the best knowledge of CRISPR technology. The system has been functionally validated for knocking-in the cassette downstream the native promoter. The efficiency of the knock-out varies due to the nature of the biology and the complexity of the

experimental process.

UniProt ID: 095352

APG7-LIKE: APG7L: GSA7 Synonyms:

Summary: This gene encodes an E1-like activating enzyme that is essential for autophagy and

> cytoplasmic to vacuole transport. The encoded protein is also thought to modulate p53dependent cell cycle pathways during prolonged metabolic stress. It has been associated with multiple functions, including axon membrane trafficking, axonal homeostasis, mitophagy, adipose differentiation, and hematopoietic stem cell maintenance. Alternative splicing results

in multiple transcript variants. [provided by RefSeq, Sep 2015]
