| Product Type: | Knockout Kits (CRISPR)   |
|---------------|--|
| Format:       | 2 gRNA vectors, 1 RFP-BSD donor, 1 scramble control  |
| Symbol:       | Cd44   |
| Locus ID:     | 12505  |
| Components:   | <ul> <li>KN302920G1, Cd44 gRNA vector 1 in pCas-Guide CRISPR vector (GE100002)</li> <li>KN302920G2, Cd44 gRNA vector 2 in pCas-Guide CRISPR vector (GE100002)</li> <li>KN302920RBD, donor DNA containing left and right homologous arms and functional cassette.</li> <li>GE100003, scramble sequence in pCas-Guide vector</li> </ul>  |
| Disclaimer:   | These products are manufactured and supplied by OriGene under license from ERS. The kit is designed based on the best knowledge of CRISPR technology. The system has been functionally validated for knocking-in the cassette downstream the native promoter. The efficiency of the knock-out varies due to the nature of the biology and the complexity of the experimental process.  |
| RefSeq:       | <u>NM_001039150, NM_001039151, NM_001177785, NM_001177786, NM_001177787, NM_009851</u>   |
| UniProt ID:   | <u>P15379</u>  |
| Synonyms:     | AU023126; AW121933; AW146109; HERMES; Ly-24; Pgp-1   |
| Summary:      | Cell-surface receptor that plays a role in cell-cell interactions, cell adhesion and migration,<br>helping them to sense and respond to changes in the tissue microenvironment. Participates<br>thereby in a wide variety of cellular functions including the activation, recirculation and<br>homing of T-lymphocytes, hematopoiesis, inflammation and response to bacterial infection.<br>Engages, through its ectodomain, extracellular matrix components such as hyaluronan/HA,<br>collagen, growth factors, cytokines or proteases and serves as a platform for signal<br>transduction by assembling, via its cytoplasmic domain, protein complexes containing<br>receptor kinases and membrane proteases (PubMed:8343954, PubMed:25065622). Such<br>effectors include PKN2, the RhoGTPases RAC1 and RHOA, Rho-kinases and phospholipase C<br>that coordinate signaling pathways promoting calcium mobilization and actin-mediated<br>cytoskeleton reorganization essential for cell migration and adhesion (By similarity).<br>[UniProtKB/Swiss-Prot Function] |
