

Product datasheet for KN308971RB

Kremen1 Mouse Gene Knockout Kit (CRISPR)

Product data:

Product Type: Knockout Kits (CRISPR)

Format: 2 gRNA vectors, 1 RFP-BSD donor, 1 scramble control

Donor DNA: RFP-BSD Symbol: Kremen1 Locus ID: 84035

Components: KN308971G1, Kremen1 gRNA vector 1 in pCas-Guide CRISPR vector (GE100002)

KN308971G2, Kremen1 gRNA vector 2 in pCas-Guide CRISPR vector (GE100002) **KN308971RBD**, donor DNA containing left and right homologous arms and RFP-BSD

functional cassette.

GE100003, scramble sequence in pCas-Guide vector

Disclaimer: These products are manufactured and supplied by OriGene under license from ERS. The kit is

designed based on the best knowledge of CRISPR technology. The system has been functionally validated for knocking-in the cassette downstream the native promoter. The efficiency of the knock-out varies due to the nature of the biology and the complexity of the

experimental process.

RefSeq: <u>NM 032396</u> **UniProt ID:** 099N43

Synonyms: AV002070; Kremen; Krm1

Summary: Receptor for Dickkopf proteins. Cooperates with DKK1/2 to inhibit Wnt/beta-catenin signaling

by promoting the endocytosis of Wnt receptors LRP5 and LRP6 (PubMed:12050670). In the absence of DKK1, potentiates Wnt-beta-catenin signaling by maintaining LRP5 or LRP6 at the cell membrane (By similarity). Can trigger apoptosis in a Wnt-independent manner and this apoptotic activity is inhibited upon binding of the ligand DKK1 (PubMed:26206087). Plays a role in limb development; attenuates Wnt signaling in the developing limb to allow normal limb patterning and can also negatively regulate bone formation (PubMed:18505822).

Modulates cell fate decisions in the developing cochlea with an inhibitory role in hair cell fate

specification (PubMed:27550540).[UniProtKB/Swiss-Prot Function]
