

# Product datasheet for KN310624RB

## Myo18a Mouse Gene Knockout Kit (CRISPR)

## **Product data:**

#### OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Knockout Kits (CRISPR)
Format:	2 gRNA vectors, 1 RFP-BSD donor, 1 scramble control
Donor DNA:	RFP-BSD
Symbol:	Myo18a
Locus ID:	360013
Components:	<ul> <li>KN310624G1, Myo18a gRNA vector 1 in pCas-Guide CRISPR vector (GE100002)</li> <li>KN310624G2, Myo18a gRNA vector 2 in pCas-Guide CRISPR vector (GE100002)</li> <li>KN310624RBD, donor DNA containing left and right homologous arms and RFP-BSD functional cassette.</li> <li>GE100003, scramble sequence in pCas-Guide vector</li> </ul>
Disclaimer:	These products are manufactured and supplied by OriGene under license from ERS. The kit is designed based on the best knowledge of CRISPR technology. The system has been functionally validated for knocking-in the cassette downstream the native promoter. The efficiency of the knock-out varies due to the nature of the biology and the complexity of the experimental process.
RefSeq:	<u>NM 001291212, NM 001291213, NM 001291214, NM 001291215, NM 011586</u>
UniProt ID:	<u>Q9 MH9</u>
Synonyms:	MAJN; MyoPDZ; MysPDZ; SP-R210

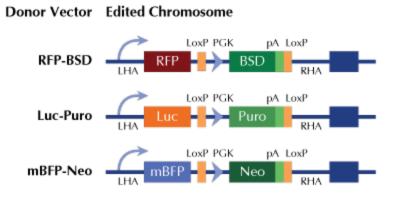

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

#### Scherker Myo18a Mouse Gene Knockout Kit (CRISPR) – KN310624RB Mouse Gene Knockout Kit (CRISPR) – KN310624RB

Summary:May link Golgi membranes to the cytoskeleton and participate in the tensile force required<br/>for vesicle budding from the Golgi. Thereby, may play a role in Golgi membrane trafficking<br/>and could indirectly give its flattened shape to the Golgi apparatus (PubMed:19837035).<br/>Alternatively, in concert with LURAP1 and CDC42BPA/CDC42BPB, has been involved in<br/>modulating lamellar actomyosin retrograde flow that is crucial to cell protrusion and<br/>migration (By similarity). May be involved in the maintenance of the stromal cell architectures<br/>required for cell to cell contact (PubMed:10733906). Regulates trafficking, expression, and<br/>activation of innate immune receptors on macrophages. Plays a role to suppress<br/>inflammatory responsiveness of macrophages via a mechanism that modulates CD14<br/>trafficking (PubMed:25965346). Acts as a receptor of surfactant-associated protein A<br/>(SFTPA1/SP-A) and plays an important role in internalization and clearance of SFTPA1-<br/>opsonized S.aureus by alveolar macrophages (PubMed:21123169). Strongly enhances natural<br/>killer cell cytotoxicity (By similarity).[UniProtKB/Swiss-Prot Function]

### **Product images:**

RFP, Luc, and mBFP will be under native gene promoter
