**Disclaimer:** These products are manufactured and supplied by OriGene under license from ERS. The kit is designed based on the best knowledge of CRISPR technology. The system has been functionally validated for knocking-in the cassette downstream the native promoter. The efficiency of the knock-out varies due to the nature of the biology and the complexity of the experimental process.

**RefSeq:** [NM\\_001134793](#), [NM\\_145014](#)

**UniProt ID:** [Q96M11](#)

**Synonyms:** HLS

**Summary:** This gene encodes a protein localized to the cytoplasm. Mutations in this gene are associated with hydrolethalmus syndrome. Multiple alternatively spliced variants, encoding the same protein, have been identified. [provided by RefSeq, Oct 2008]
