OTI Disclaimer:	These products are manufactured and supplied by OriGene under license from ERS. The kit is designed based on the best knowledge of CRISPR technology. The system has been functionally validated for knocking-in the cassette downstream the native promoter. The efficiency of the knock-out varies due to the nature of the biology and the complexity of the experimental process.
RefSeq:	<u>NM_004677</u>
UniProt ID:	<u>A2RUG3</u>
Synonyms:	XKRY1
Summary:	This probable pseudogene is located in the nonrecombining portion of the Y chromosome, and is expressed specifically in testis. It is similar to the XK (X-linked Kell blood group precursor) gene, which encodes a putative membrane transport protein. This gene is present as two identical copies within a palindromic region; this record represents the more centromeric copy. [provided by RefSeq, Nov 2020]
