RefSeq:	NM_001007524
UniProt ID:	P23610
Synonyms:	coagulation factor VIII-associated (intronic transcript) 3; OTTHUMP00000032188
Summary:	This gene is part of a region that is repeated three times on chromosome X, once in intron 22 of the F8 gene and twice closer to the Xq telomere. This record represents the most telomeric copy. Although its function is unknown, the observation that this gene is conserved in the mouse implies it has some function. Unlike factor VIII, this gene is transcribed abundantly in a wide variety of cell types. [provided by RefSeq, Jul 2008]
