

## Product datasheet for **KN423846**

### MMACHC Human Gene Knockout Kit (CRISPR)

#### Product data:

Product Type:	Knockout Kits (CRISPR)
Format:	2 gRNA vectors, 1 linear donor
Donor DNA:	EF1a-GFP-P2A-Puro
Symbol:	MMACHC
Locus ID:	25974

[View online »](#)

**Components:**
**KN423846G1**, MMACHC gRNA vector 1 in pCas-Guide CRISPR vector (GE100002)

**KN423846G2**, MMACHC gRNA vector 2 in pCas-Guide CRISPR vector (GE100002)

**KN423846D**, Linear donor DNA containing LoxP-EF1a-tGFP-P2A-Puro-LoxP:

The sequence below is cassette sequence only. The linear donor DNA also contains proprietary target sequence.

LoxP-EF1a-tGFP-P2A-Puro-LoxP (2739 bp)

**Disclaimer:** These products are manufactured and supplied by OriGene under license from ERS. The kit is designed based on the best knowledge of CRISPR technology. The system has been functionally validated for knocking-in the cassette downstream the native promoter. The efficiency of the knock-out varies due to the nature of the biology and the complexity of the experimental process.

**RefSeq:** [NM\\_015506](#), [NM\\_001330540](#)

**UniProt ID:** [Q9Y4U1](#)

**Synonyms:** cb1C

**Summary:** The exact function of the protein encoded by this gene is not known, however, its C-terminal region shows similarity to TonB, a bacterial protein involved in energy transduction for cobalamin (vitamin B12) uptake. Hence, it is postulated that this protein may have a role in the binding and intracellular trafficking of cobalamin. Mutations in this gene are associated with methylmalonic aciduria and homocystinuria type cb1C. [provided by RefSeq, Oct 2009]
