

Product datasheet for **KN428027**

Small integral membrane protein 1 (SMIMI) Human Gene Knockout Kit (CRISPR)

Product data:

Product Type:	Knockout Kits (CRISPR)
Format:	2 gRNA vectors, 1 linear donor
Donor DNA:	EF1a-GFP-P2A-Puro
Symbol:	Small integral membrane protein 1
Locus ID:	388588

Components:

KN428027G1, Small integral membrane protein 1 gRNA vector 1 in pCas-Guide CRISPR vector (GEI00002)

KN428027G2, Small integral membrane protein 1 gRNA vector 2 in pCas-Guide CRISPR vector (GEI00002)

KN428027D, Linear donor DNA containing LoxP-EF1A-tGFP-P2A-Puro-LoxP:

The sequence below is cassette sequence only. The linear donor DNA also contains proprietary target sequence.

LoxP-EF1A-tGFP-P2A-Puro-LoxP (2739 bp)

OTI Disclaimer:	These products are manufactured and supplied by OriGene under license from ERS. The kit is designed based on the best knowledge of CRISPR technology. The system has been functionally validated for knocking-in the cassette downstream the native promoter. The efficiency of the knock-out varies due to the nature of the biology and the complexity of the experimental process.
RefSeq:	NM_001163724 , NM_001288583 , NR_024432
UniProt ID:	B2RUZ4
Synonyms:	Vel
Summary:	This gene encodes a small, conserved protein that participates in red blood cell formation. The encoded protein is localized to the cell membrane and is the antigen for the Vel blood group. Alternative splicing results in different transcript variants that encode the same protein. [provided by RefSeq, Dec 2013]
