**Disclaimer:** These products are manufactured and supplied by OriGene under license from ERS. The kit is designed based on the best knowledge of CRISPR technology. The system has been functionally validated for knocking-in the cassette downstream the native promoter. The efficiency of the knock-out varies due to the nature of the biology and the complexity of the experimental process.

**UniProt ID:** [O70137](#)

**Summary:** This gene belongs to Group 1 of aristaless-like genes, which are characterized by the presence of an aristaless domain and a conserved paired-like homeodomain. The encoded protein acts as a transcriptional regulator. The protein plays a role in the development of craniofacial and appendicular skeleton and may have a role in pancreatic function.
