Disclaimer: These products are manufactured and supplied by OriGene under license from ERS. The kit is designed based on the best knowledge of CRISPR technology. The system has been functionally validated for knocking-in the cassette downstream the native promoter. The efficiency of the knock-out varies due to the nature of the biology and the complexity of the experimental process.

Summary: A synthetic peptide displays antimicrobial activities against *S.aureus*, *P.aeruginosa*, *E.coli* and *B.cepacia*. The antimicrobial activity against *S.aureus*, *E.coli* and *B.cepacia* is reduced in raised concentration of NaCl, but its action against *P.aeruginosa* is independent of NaCl concentration.[UniProtKB/Swiss-Prot Function]
