Disclaimer: These products are manufactured and supplied by OriGene under license from ERS. The kit is designed based on the best knowledge of CRISPR technology. The system has been functionally validated for knocking-in the cassette downstream the native promoter. The efficiency of the knock-out varies due to the nature of the biology and the complexity of the experimental process.

RefSeq: [NM_010053](#)

UniProt ID: [Q64317](#)

Synonyms: Dlx; Dlx-1

Summary: The protein encoded by this gene is a homeobox-containing transcription factor involved in development. The encoded protein plays a role in craniofacial patterning, as well as in bone, placenta, and sensory organ formation. [provided by RefSeq, Aug 2015]
