Disclaimer: These products are manufactured and supplied by OriGene under license from ERS. The kit is designed based on the best knowledge of CRISPR technology. The system has been functionally validated for knocking-in the cassette downstream the native promoter. The efficiency of the knock-out varies due to the nature of the biology and the complexity of the experimental process.

RefSeq: [NM_183298](#)

UniProt ID: [Q8R2I0](#)

Synonyms: Titf2

Summary: Transcription factor that binds consensus sites on a variety of gene promoters and activate their transcription. Involved in proper palate formation, most probably through the expression of MSX1 and TGFB3 genes which are direct targets of this transcription factor (PubMed:21177256). Also implicated in thyroid gland morphogenesis (PubMed:9697704). May indirectly play a role in cell growth and migration through the regulation of WNT5A expression (By similarity).[UniProtKB/Swiss-Prot Function]
