

## Product datasheet for **KN510692**

### NaaladII Mouse Gene Knockout Kit (CRISPR)

#### Product data:

|               |                                |
|---------------|--------------------------------|
| Product Type: | Knockout Kits (CRISPR)         |
| Format:       | 2 gRNA vectors, 1 linear donor |
| Donor DNA:    | EF1a-GFP-P2A-Puro              |
| Symbol:       | NaaladII                       |
| Locus ID:     | 381204                         |

Components:

**KN510692G1**, Naaladl1 gRNA vector 1 in pCas-Guide CRISPR vector (GEI00002)

**KN510692G2**, Naaladl1 gRNA vector 2 in pCas-Guide CRISPR vector (GEI00002)

**KN510692D**, Linear donor DNA containing LoxP-EF1A-tGFP-P2A-Puro-LoxP:

The sequence below is cassette sequence only. The linear donor DNA also contains proprietary target sequence.

LoxP-EF1A-tGFP-P2A-Puro-LoxP (2739 bp)

| <b>OTI Disclaimer:</b> | These products are manufactured and supplied by OriGene under license from ERS. The kit is designed based on the best knowledge of CRISPR technology. The system has been functionally validated for knocking-in the cassette downstream the native promoter. The efficiency of the knock-out varies due to the nature of the biology and the complexity of the experimental process. |
| <b>RefSeq:</b>         | <u><a href="#">NM_001009546</a></u>                                                                                                                                                                                                                                                                                                                                                   |

| <b>Synonyms:</b>       | Gm964; Naaladase1                                                                                                                                                                                                                                                                                                                                                                     |
| <b>Summary:</b>        | Aminopeptidase with broad substrate specificity. Has lower activity with substrates that have Asp or Glu in the P2' position, or Pro in the P3' position. Lacks activity with substrates that have both Pro in the P3' position and Asp or Glu in the P2' position. Lacks carboxypeptidase activity. Lacks dipeptidyl-peptidase IV type activity.[UniProtKB/Swiss-Prot Function]      |
