RefSeq:	NM_011986 , NM_001355412 , NM_001355413
UniProt ID:	Q9Z0E0
Synonyms:	AU042419; mKIAA0607; MMS10-AE; Ms10ae; norbin
Summary:	Probably involved in signal transduction, in the nervous system, via increasing cell surface localization of GRM5 and positively regulating its signaling. Required for the spatial learning process. Acts as a negative regulator of Ca(2+)-calmodulin-dependent protein kinase 2 (CaMK2) phosphorylation. May play a role in modulating melanin-concentrating hormone-mediated functions via its interaction with MCHR1 that interferes with G protein-coupled signal transduction. May be involved in bone metabolism. May also be involved in neurite outgrowth.[UniProtKB/Swiss-Prot Function]
