**Disclaimer:** These products are manufactured and supplied by OriGene under license from ERS. The kit is designed based on the best knowledge of CRISPR technology. The system has been functionally validated for knocking-in the cassette downstream the native promoter. The efficiency of the knock-out varies due to the nature of the biology and the complexity of the experimental process.

**RefSeq:** [NM\\_011036](#)

**UniProt ID:** [P35230](#)

**Synonyms:** HIP; Pap; PAP1; REG-III

**Summary:** Bactericidal C-type lectin which acts against several intestinal Gram-positive and Gram-negative bacteria. Lacks antibacterial activity against *S.typhimurium*. May play a role in protection against infection with *S.enteritidis* by inhibiting its translocation from the gut lumen into intestinal tissues and further extraintestinal tissues.[UniProtKB/Swiss-Prot Function]
