HNF 4 alpha (HNF4A) (NM_001030004) Human Over-expression Lysate

Product data:

Product Type: Over-expression Lysates

Description: HNF4A HEK293T cell transient overexpression lysate (as WB positive control)

Species: Human
Expression Host: HEK293T

Expression cDNA Clone

LAPI ESSION CONA CIONE

TrueORF Clone RC216588

or AA Sequence:

Tag: C-Myc/DDK

Detection Antibodies: Clone OTI4C5, Anti-DDK (FLAG) monoclonal antibody (TA50011-100)

ACCN: <u>NM 001030004</u>, <u>NP 001025175</u>

Synonyms: FRTS4; HNF4; HNF4a7; HNF4a8; HNF4a9; HNF4alpha; MODY; MODY1; NR2A1; NR2A21; TCF;

TCF-14; TCF14

Predicted MW: 43.8 kDa

Components: 1 vial of 20 ug lyophilized gene specific transient over-expression cell lysate

Storage: The lysate can be shipped at ambient temperature. Upon receiving, store the sample at -

20°C. Lysate samples can be reconstituted with SDS Sample Buffer. Avoid repeated freezethaw cycles after reconstitution. Lysate samples are stable for 12 months from date of receipt

when stored at -20°C.

Preparation: HEK293T cells in 10-cm dishes were transiently transfected with MegaTran Transfection

Reagent (TT200002) and 5ug <u>TrueORF</u> cDNA plasmid. Transfected cells were cultured for 48hrs before collection. The cells were lysed in modified RIPA buffer (25mM Tris-HCl pH7.6, 150mM NaCl, 1% NP-40, 1mM EDTA, 1xProteinase inhibitor cocktail mix (Sigma), 1mM PMSF and 1mM Na3VO4), and then centrifuged to clarify the lysate. Protein concentration was measured by BCA kit (Thermo Scientific Inc.). To facilitate transportation and protein, the

products are supplied as lyophilized proteins.

RefSeq: NP 001025175

Locus ID: 3172

Cytogenetics: 20q13.12

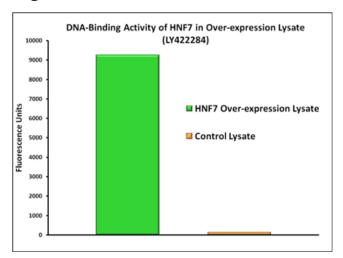

Protein Families: Druggable Genome, ES Cell Differentiation/IPS, Nuclear Hormone Receptor, Transcription

Factors

Protein Pathways: Maturity onset diabetes of the young

Product images:

DNA-binding activity of HNF7 was measured in OriGene over-expression lysate [LY422284] and a control lysate. Three microliters of each lysate was tested with a transcription factor binding assay utilizing HNF7-specific DNA sequences. The high level of activity observed in the over-expression lysate compared to the control lysate demonstrates that the expressed HNF7 is biologically active in the lysate. Overexpression cell lysates are prepared from HEK293T cells transfected with [RC216588] using transfection reagent MegaTran 2.0 (Cat# [TT210002]).
