

Product datasheet for MC200071

Csn1s2b (NM_009973) Mouse Untagged Clone

Product data:

Product Type: Expression Plasmids

Product Name: Csn1s2b (NM_009973) Mouse Untagged Clone

Tag: Tag Free
Symbol: Csn1s2b

Synonyms: AW987150; Cs; Csnd; Csne

Mammalian Cell

Selection:

Neomycin

Vector: PCMV6-Kan/Neo (PCMV6KN)

E. coli Selection: Kanamycin (25 ug/mL)

Fully Sequenced ORF: >BC002084 sequence for NM_009973

Restriction Sites: Rsrll-Notl **ACCN:** NM 009973

Insert Size: 432 bp

OTI Disclaimer: Our molecular clone sequence data has been matched to the reference identifier above as a

point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative

RNA splicing form or single nucleotide polymorphism (SNP).

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

OriGene Technologies, Inc. 9620 Medical Center Drive, Ste 200

Reconstitution Method:

- 1. Centrifuge at 5,000xg for 5min.
- 2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.
- 3. Close the tube and incubate for 10 minutes at room temperature.
- 4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.
- 5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.

Note: Plasmids are not sterile. For experiments where strict sterility is required, filtration with

0.22um filter is required.

RefSeq: <u>BC002084</u>, <u>AAH02084</u>

 RefSeq Size:
 760 bp

 RefSeq ORF:
 432 bp

 Locus ID:
 12992

 UniProt ID:
 P02664

 Cytogenetics:
 5 43.56 cM

Gene Summary: This gene is a member of the alpha-s2-like casein gene family, and this gene product is a

calcium-sensitive casein. Members of this gene family are organized as a gene cluster that is conserved in its order, but with greater conservation amongst orthologs than paralogs. The protein encoded by this gene interacts with other casein proteins to form a micelle structure, and is a major source of protein in milk. This structure is important for the transport of calcium, phosphate, and protein. Alternative splicing results in multiple transcript variants

encoding different protein isoforms. [provided by RefSeq, Aug 2014]

Transcript Variant: This variant (1) represents the longest transcript and encodes the longest

isoform (1).
