| Product Type:        | Expression Plasmids   |
|----------------------|---|
| Product Name:        | Gcsam (NM_001159297) Mouse Untagged Clone   |
| Tag:                 | Tag Free  |
| Symbol:              | Gcsam   |
| Synonyms:            | Gcet; Gcet2; M17; M17-L   |
| Vector:              | pCMV6-Entry (PS100001)  |
| E. coli Selection:   | Kanamycin (25 ug/mL)  |
| Cell Selection:      | Neomycin  |
| Fully Sequenced ORF: | >MC208529 representing NM_001159297<br>Red=Cloning site Blue=ORF Orange=Stop codon  |

| Restriction Sites:   | Sgfl-Mlul   |
| ACCN:                | NM_001159297  |
| Insert Size:         | 546 bp  |
| OTI Disclaimer:      | Our molecular clone sequence data has been matched to the reference identifier above as a<br>point of reference. Note that the complete sequence of our molecular clones may differ from<br>the sequence published for this corresponding reference, e.g., by representing an alternative<br>RNA splicing form or single nucleotide polymorphism (SNP).   |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

| Gcsam (NM_001159297) Mouse Untagged Clone – MC208529 |   |  |
|--|---|--|
| Components:  | The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).  |  |
| Reconstitution Method:                               | <ol> <li>Centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol>  |  |
| RefSeq:  | <u>NM 001159297.1, NP 001152769.1</u>   |  |
| RefSeq Size:   | 3364 bp   |  |
| RefSeq ORF:  | 546 bp  |  |
| Locus ID:  | 14525   |  |
| UniProt ID:  | Q6RFH4  |  |
| Cytogenetics:  | 16 B5   |  |
| Gene Summary:  | Involved in the negative regulation of lymphocyte motility. It mediates the migration-<br>inhibitory effects of IL6. Serves as a positive regulator of the RhoA signaling pathway.<br>Enhancement of RhoA activation results in inhibition of lymphocyte and lymphoma cell<br>motility by activation of its downstream effector ROCK. Is a regulator of B-cell receptor<br>signaling, that acts through SYK kinase activation.[UniProtKB/Swiss-Prot Function]<br>Transcript Variant: This variant (1) represents the longer transcript and encodes the longer |  |
