

Product datasheet for MC224312

Disp2 (NM_170593) Mouse Untagged Clone

Product data:

Product Type:	Expression Plasmids
Product Name:	Disp2 (NM_170593) Mouse Untagged Clone
Tag:	Tag Free
Symbol:	Disp2
Synonyms:	AI840597; B230210L08Rik; Di; DispB; mKIAA1742
Mammalian Cell Selection:	Neomycin
Vector:	pCMV6-Entry (PS100001)
E. coli Selection:	Kanamycin (25 ug/mL)
Fully Sequenced ORF:	>MC224312 representing NM_170593 Red=Cloning site Blue=ORF Orange=Stop codon

- Chromatograms: https://cdn.origene.com/chromatograms/ja2156_e09.zip
- Restriction Sites: SgfI-MluI
- ACCN: NM_170593
- Insert Size: 4038 bp

OTI Disclaimer: Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at custsupport@origene.com or by calling 301.340.3188 option 3 for pricing and delivery.

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. [More info](#)

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method:

1. Centrifuge at 5,000xg for 5min.
2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.
3. Close the tube and incubate for 10 minutes at room temperature.
4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.
5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.

RefSeq: [NM_170593.3](#), [NP_733481.1](#)

RefSeq Size: 6629 bp

RefSeq ORF: 4038 bp

Locus ID: 214240

UniProt ID: [Q8CIP5](#)

Cytogenetics: 2 E5

Gene Summary: The pattern of cellular proliferation and differentiation that leads to normal development of embryonic structures often depends upon the localized production of secreted protein signals. Cells surrounding the source of a particular signal respond in a graded manner according to the effective concentration of the signal, and this response produces the pattern of cell types constituting the mature structure. A segment-polarity gene known as dispatched has been identified in Drosophila and its protein product is required for normal Hedgehog (Hh) signaling. [provided by RefSeq, Sep 2015]
