

Product datasheet for **MC225975**

Hes2 (NM_001301805) Mouse Untagged Clone

Product data:

Product Type:	Expression Plasmids
Product Name:	Hes2 (NM_001301805) Mouse Untagged Clone
Tag:	Tag Free
Symbol:	Hes2
Synonyms:	HES-; HES-2
Mammalian Cell Selection:	Neomycin
Vector:	pCMV6-Entry (PS100001)
E. coli Selection:	Kanamycin (25 ug/mL)
Restriction Sites:	Sgfl-Mlul
ACCN:	NM_001301805
Insert Size:	474 bp
OTI Disclaimer:	Our molecular clone sequence data has been matched to the reference identifier above as a point of reference. Note that the complete sequence of our molecular clones may differ from the sequence published for this corresponding reference, e.g., by representing an alternative RNA splicing form or single nucleotide polymorphism (SNP).
OTI Annotation:	Clone contains native stop codon, and expresses the complete ORF without any c-terminal tag.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	<ol style="list-style-type: none">1. Centrifuge at 5,000xg for 5min.2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.3. Close the tube and incubate for 10 minutes at room temperature.4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.
RefSeq:	NM_001301805.1 , NP_001288734.1

RefSeq Size: 2915 bp

RefSeq ORF: 474 bp

Locus ID: 15206

UniProt ID: [Q54792](#)

Cytogenetics: 4 82.92 cM

Gene Summary: The protein encoded by this gene belongs to the mammalian Hes gene family, the mammalian homologues of *Drosophila* hairy and Enhancer of split. Hes 2 is a basic helix-loop-helix transcriptional repressor and is an effector of the Notch signaling pathway. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Sep 2014]
Transcript Variant: This variant (1) represents the longer transcript. Both variants 1 and 2 encode the same protein.
