

## **Product datasheet for MG200403**

## Atp5j (BC010766) Mouse Tagged ORF Clone

**Product data:** 

**Product Type:** Expression Plasmids

**Product Name:** Atp5j (BC010766) Mouse Tagged ORF Clone

Tag: TurboGFP

Symbol: Atp5j
Synonyms: CF6

Synonyms: CF6

Mammalian Cell Neomycin

Selection:

Vector: pCMV6-AC-GFP (PS100010)

E. coli Selection: Ampicillin (100 ug/mL)

ORF Nucleotide >MG200403 representing BC010766

Sequence: Red=Cloning site Blue=ORF Green=Tags(s)

## **Cloning Scheme:**

**ACCN:** BC010766

ORF Size: 326 bp

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

**RefSeq:** <u>BC010766</u>, <u>AAH10766</u>

RefSeq Size: 797 bp RefSeq ORF: 326 bp

**Locus ID:** 11957

Cytogenetics: 16 C3.3

Gene Summary: The protein encoded by this gene is a component of mitochondrial adenosine triphosphate

synthase, which catalyzes the conversion of ATP from ADP. Mitochondrial adenosine triphosphate synthase consists of extrinsic and intrinsic membrane domains that are joined by a stalk. The protein encoded by this gene is a subunit of the stalk domain. A bi-directional promoter that drives expression of this gene has been has been identified. Pseudogenes of

this gene are found on chromosomes 14 and 17. Alternative splicing results in multiple

transcript variants. [provided by RefSeq, Oct 2014]
