

Product datasheet for MG203998

Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com

OriGene Technologies, Inc. 9620 Medical Center Drive, Ste 200

CN: techsupport@origene.cn

Cnot8 (NM_026949) Mouse Tagged ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: Cnot8 (NM_026949) Mouse Tagged ORF Clone

Tag: TurboGFP

Symbol: Cnot8

Synonyms: 1500015I04Rik; 1810022F04Rik; AA536816; AU015770; AU043059

Mammalian Cell

Selection:

Neomycin

Vector: pCMV6-AC-GFP (PS100010)

E. coli Selection: Ampicillin (100 ug/mL)

ORF Nucleotide >MG203998 representing NM_026949

Sequence: Red=Cloning site Blue=ORF Green=Tags(s)

ORF Size: 876 bp

Cnot8 (NM_026949) Mouse Tagged ORF Clone - MG203998

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: NM 026949.2

RefSeq Size: 2035 bp
RefSeq ORF: 879 bp
Locus ID: 69125
UniProt ID: Q9D8X5

Cytogenetics: 11 B1.3

Gene Summary: Has 3'-5' poly(A) exoribonuclease activity for synthetic poly(A) RNA substrate. Its function

seems to be partially redundant with that of CNOT7. Catalytic component of the CCR4-NOT complex which is linked to various cellular processes including bulk mRNA degradation, miRNA-mediated repression, translational repression during translational initiation and general transcription regulation. During miRNA-mediated repression the complex seems also to act as translational repressor during translational initiation. Additional complex functions may be a consequence of its influence on mRNA expression. Associates with members of the

BTG family such as TOB1 and BTG2 and is required for their anti-proliferative activity.

[UniProtKB/Swiss-Prot Function]
