

Product datasheet for MG204957

Ldhb (NM_008492) Mouse Tagged ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: Ldhb (NM 008492) Mouse Tagged ORF Clone

Tag: TurboGFP

Symbol: Ldhb

Synonyms: Al790582; H-Ld; H-Ldh; Ldh-; Ldh-2; LDH-B; LDH-H; Ldh2

Mammalian Cell Neomycin

Selection:

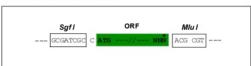

Vector: pCMV6-AC-GFP (PS100010)

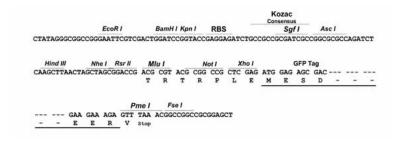

E. coli Selection: Ampicillin (100 ug/mL)

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

Cloning sites used for ORF Shuttling:

ACCN: NM_008492

ORF Size: 1002 bp

OriGene Technologies, Inc. 9620 Medical Center Drive, Ste 200

Ldhb (NM_008492) Mouse Tagged ORF Clone - MG204957

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

6 74.17 cM

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

Note: Plasmids are not sterile. For experiments where strict sterility is required, filtration with

0.22um filter is required.

RefSeq: <u>NM 008492.3</u>

RefSeq Size: 1324 bp
RefSeq ORF: 1005 bp
Locus ID: 16832
UniProt ID: P16125

Cytogenetics:

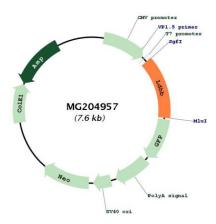

Gene Summary: This gene encodes the B subunit of lactate dehydrogenase enzyme, which catalyzes the

interconversion of pyruvate and lactate with concomitant interconversion of NADH and NAD+ in a post-glycolysis process. Alternatively spliced transcript variants have also been found for this gene. Recent studies have shown that a C-terminally extended isoform is produced by use of an alternative in-frame translation termination codon via a stop codon readthrough mechanism, and that this isoform is localized in the peroxisomes. Pseudogenes have been

identified on chromosomes 1 and 19. [provided by RefSeq, Feb 2016]
