

# Product datasheet for MG206402

## Bhmt (NM\_016668) Mouse Tagged ORF Clone

### **Product data:**

ACCN:

**ORF Size:** 

Product Type:	Expression Plasmids
Product Name:	Bhmt (NM_016668) Mouse Tagged ORF Clone
Tag:	TurboGFP
Symbol:	Bhmt
Synonyms:	MGC46866; MGC117976
Mammalian Cell Selection:	Neomycin
Vector:	pCMV6-AC-GFP (PS100010)
E. coli Selection:	Ampicillin (100 ug/mL)
<b>Restriction Sites:</b>	Sgfl-Mlul
Cloning Scheme:	Cloning sites used for ORF Shuttling:

<b>GRIGENE</b> Bhmt (NM_016668) Mouse Tagged ORF Clone – MG206402	
OTI Disclaimer:	Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.
	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Meth	<ol> <li>1. Centrifuge at 5,000xg for 5min.</li> <li>2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>3. Close the tube and incubate for 10 minutes at room temperature.</li> <li>4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol>
Note:	Plasmids are not sterile. For experiments where strict sterility is required, filtration with 0.22um filter is required.
RefSeq:	<u>NM 016668.3, NP 057877.1</u>
RefSeq Size:	2081 bp
RefSeq ORF:	1224 bp
Locus ID:	12116
UniProt ID:	<u>035490</u>
Cytogenetics:	13 C3
Gene Summary:	Involved in the regulation of homocysteine metabolism. Converts betaine and homocysteine

to dimethylglycine and methionine, respectively. This reaction is also required for the

irreversible oxidation of choline.[UniProtKB/Swiss-Prot Function]
