OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a poin reference only. However, individual transcript sequences of the same gene can differ t naturally occurring variations (e.g. polymorphisms), each with its own valid existence. Clone is substantially in agreement with the reference, but a complete review of all prevariants is recommended prior to use. <u>More info</u>	hrough This
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Express varies depending on the nature of the gene.	ssion
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix t containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of v	
Reconstitution M	 hod: 1. Centrifuge at 5,000xg for 5min. 2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA. 3.
