| OTI Disclaimer:              | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation:              | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.  |

Gene Summary:Plays role in pre-mRNA splicing as component of the U4/U6-U5 tri-snRNP complex that is<br/>involved in spliceosome assembly, and as component of the precatalytic spliceosome<br/>(spliceosome B complex). The heptameric LSM2-8 complex binds specifically to the 3'-<br/>terminal U-tract of U6 snRNA.[UniProtKB/Swiss-Prot Function]
