

# Product datasheet for MR200395L3V

## Ccl19 (BC051472) Mouse Tagged ORF Clone Lentiviral Particle

### **Product data:**

#### **Product Type: Lentiviral Particles Product Name:** Ccl19 (BC051472) Mouse Tagged ORF Clone Lentiviral Particle Symbol: Ccl19 ELC, MIP3B, exodus-3, CKb11 Synonyms: **Mammalian Cell** Puromycin Selection: Vector: pLenti-C-Myc-DDK-P2A-Puro (PS100092) Tag: Myc-DDK ACCN: BC051472 ORF Size: 324 bp The ORF insert of this clone is exactly the same as(MR200395). **ORF** Nucleotide Sequence: **OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info **OTI** Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. **RefSeq:** BC051472, AAH51472 **RefSeq Size:** 734 bp **RefSeq ORF:** 326 bp Locus ID: 24047 Cytogenetics: 4 A 5

Gene Summary:Strongly chemotactic for naive (L-selectinhi) CD4 T-cells and for CD8 T-cells and weakly<br/>attractive for resting B-cells and memory (L-selectinlo) CD4 T-cells. May play a role in<br/>promoting encounters between recirculating T-cells and dendritic cells and in the migration<br/>of activated B-cells into the T-zone of secondary lymphoid tissues. Binds to chemokine<br/>receptor CCR7. Binds to atypical chemokine receptor ACKR4 and mediates the recruitment of<br/>beta-arrestin (ARRB1/2) to ACKR4.[UniProtKB/Swiss-Prot Function]
