

### **Product datasheet for MR200811L3**

# Fabp5 (NM\_010634) Mouse Tagged Lenti ORF Clone

### **Product data:**

**Product Type:** Expression Plasmids

**Product Name:** Fabp5 (NM\_010634) Mouse Tagged Lenti ORF Clone

Tag: Myc-DDK
Symbol: Fabp5

Synonyms: E-FABP; Fabpe; Kl; Klbp; ma; mal1; PA-FABP

Mammalian Cell Puromycin

Selection:

**Vector:** pLenti-C-Myc-DDK-P2A-Puro (PS100092)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(MR200811).

Sequence:

**Restriction Sites:** Sgfl-Mlul

**Cloning Scheme:** 

st The last codon before the Stop codon of the ORF.

**ACCN:** NM\_010634

ORF Size: 408 bp

**OriGene Technologies, Inc.** 9620 Medical Center Drive, Ste 200

#### Fabp5 (NM\_010634) Mouse Tagged Lenti ORF Clone - MR200811L3

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 010634.2</u>, <u>NP 034764.1</u>

 RefSeq Size:
 969 bp

 RefSeq ORF:
 408 bp

 Locus ID:
 16592

 UniProt ID:
 Q05816

 Cytogenetics:
 3 A1

**Gene Summary:** The protein encoded by this gene is part of the fatty acid binding protein family (FABP). FABPs

are a family of small, highly conserved, cytoplasmic proteins that bind long-chain fatty acids

and other hydrophobic ligands and participate in fatty acid uptake, transport, and

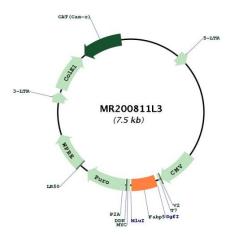

metabolism. In humans this gene has been associated with psoriasis and type 2 diabetes. In mouse deficiency of this gene in combination with a deficiency in Fabp4 confers protection

against atherosclerosis, diet-induced obesity, insulin resistance and experimental

autoimmune encephalomyelitis (the mouse model for multiple sclerosis). Alternative splicing results in multiple transcript variants that encode different protein isoforms. The mouse genome contains many pseudogenes similar to this locus. [provided by RefSeq, Jan 2013]
