

Product datasheet for MR202718

Rybp (NM_019743) Mouse Tagged ORF Clone

Product data:

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

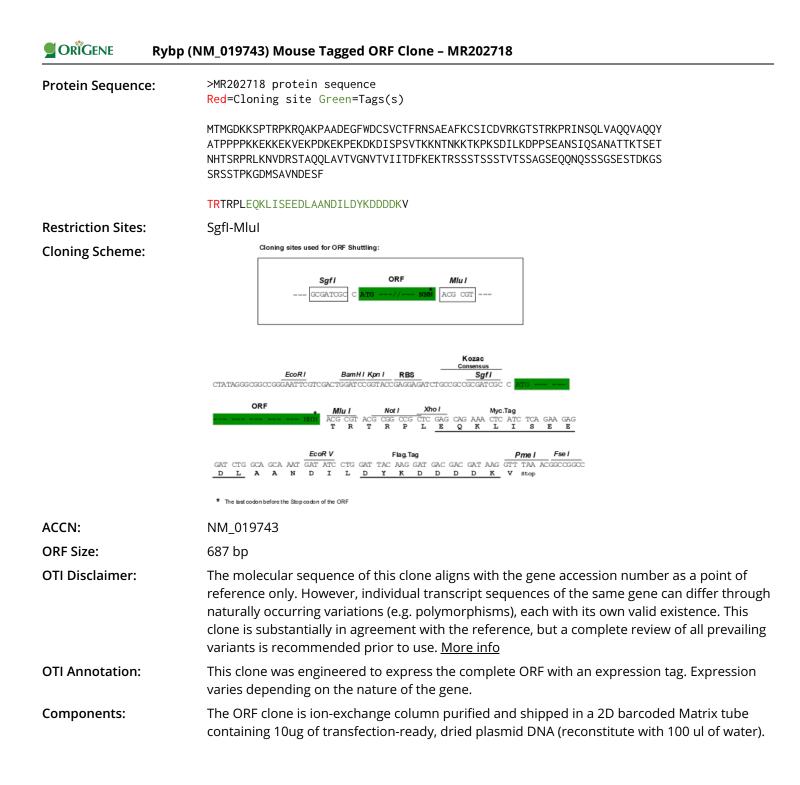

| Product Type: | Expression Plasmids |
|------------------------------|--|
| Product Name: | Rybp (NM_019743) Mouse Tagged ORF Clone |
| Tag: | Myc-DDK |
| Symbol: | Rybp |
| Synonyms: | 2410018J24Rik; DEDAF; YEAF1 |
| Mammalian Cell Selection: | Neomycin |
| Vector: | pCMV6-Entry (PS100001) |
| E. coli Selection: | Kanamycin (25 ug/mL) |
| ORF Nucleotide Sequence: | >MR202718 ORF sequence Red=Cloning site Blue=ORF Green=Tags(s) |

GRIGENE Rybp (NM_019743) Mouse Tagged ORF Clone – MR202718

| Reconstitution Method: | Centrifuge at 5,000xg for 5min. Carefully open the tube and add 100ul of sterile water to dissolve the DNA. Close the tube and incubate for 10 minutes at room temperature. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C. |
|------------------------|---|
| RefSeq: | <u>NM 019743.3, NP 062717.2</u> |
| RefSeq Size: | 4376 bp |
| RefSeq ORF: | 687 bp |
| Locus ID: | 56353 |
| UniProt ID: | <u>Q8CCI5</u> |
| Cytogenetics: | 6 D3 |
| MW: | 24.8 kDa |
| Gene Summary: | Component of a Polycomb group (PcG) multiprotein PRC1-like complex, a complex class required to maintain the transcriptionally repressive state of many genes, including Hox genes, throughout development. PcG PRC1-like complex acts via chromatin remodeling and modification of histones; it mediates monoubiquitination of histone H2A 'Lys-119', rendering chromatin heritably changed in its expressibility (PubMed:22325148, PubMed:28596365). Component of a PRC1-like complex that mediates monoubiquitination of histone H2A 'Lys-119' on the X chromosome and is required for normal silencing of one copy of the X chromosome in XX females (PubMed:28596365). May stimulate ubiquitination of histone H2A 'Lys-119' by recruiting the complex to target sites (PubMed:22325148, PubMed:28596365). |

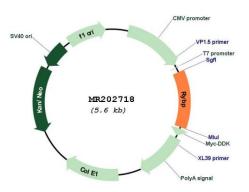

Inhibits ubiquitination and subsequent degradation of TP53, and thereby plays a role in regulating transcription of TP53 target genes (By similarity). May also regulate the ubiquitinmediated proteasomal degradation of other proteins like FANK1 to regulate apoptosis (PubMed:17874297). May be implicated in the regulation of the transcription as a repressor of the transcriptional activity of E4TF1 (By similarity). May bind to DNA (PubMed:19170609). May play a role in the repression of tumor growth and metastasis in breast cancer by down-

regulating SRRM3 (PubMed:27748911).[UniProtKB/Swiss-Prot Function]
