

### **Product datasheet for MR203190L3**

# Gosr1 (NM\_016810) Mouse Tagged Lenti ORF Clone

### **Product data:**

**Product Type:** Expression Plasmids

**Product Name:** Gosr1 (NM\_016810) Mouse Tagged Lenti ORF Clone

Tag: Myc-DDK

Symbol: Gosr1

**Synonyms:** Al414660; Al426320; BB145494; GOS-28; GOSRI; GS28

Mammalian Cell Puromycin

Selection:

**Vector:** pLenti-C-Myc-DDK-P2A-Puro (PS100092)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(MR203190).

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

<sup>\*</sup> The last codon before the Stop codon of the ORF.

**ACCN:** NM\_016810

ORF Size: 750 bp

#### Gosr1 (NM\_016810) Mouse Tagged Lenti ORF Clone - MR203190L3

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

**Note:** Plasmids are not sterile. For experiments where strict sterility is required, filtration with

0.22um filter is required.

**RefSeq:** <u>NM 016810.3</u>

 RefSeq Size:
 4265 bp

 RefSeq ORF:
 753 bp

 Locus ID:
 53334

 UniProt ID:
 088630

Cytogenetics: 11 B5

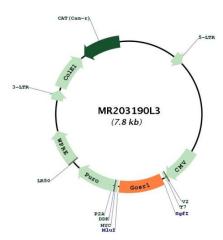

**Gene Summary:** Involved in transport from the ER to the Golgi apparatus as well as in intra-Golgi transport. It

belongs to a super-family of proteins called t-SNAREs or soluble NSF (N-ethylmaleimide-sensitive factor) attachment protein receptor. May play a protective role against hydrogen peroxide induced cytotoxicity under glutathione depleted conditions in neuronal cells by regulating the intracellular ROS levels via inhibition of p38 MAPK (MAPK11, MAPK12, MAPK13 and MAPK14). Participates in docking and fusion stage of ER to cis-Golgi transport. Plays an important physiological role in VLDL-transport vesicle-Golgi fusion and thus in VLDL delivery

to the hepatic cis-Golgi (By similarity), [UniProtKB/Swiss-Prot Function]
