

## Product datasheet for MR204934L3

# Gapdh (NM\_008084) Mouse Tagged Lenti ORF Clone

Puromycin

### **Product data:**

**Product Type:** Expression Plasmids

**Product Name:** Gapdh (NM\_008084) Mouse Tagged Lenti ORF Clone

Tag: Myc-DDK
Symbol: Gapdh

Synonyms: Ga; Gapd

Selection:

Vector:

**Mammalian Cell** 

pLenti-C-Myc-DDK-P2A-Puro (PS100092)

E. coli Selection: Chloramphenicol (34 ug/mL)

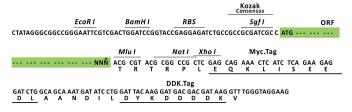

ORF Nucleotide The ORF insert of this clone is exactly the same as(MR204934).

Sequence:

**Restriction Sites:** Sgfl-Mlul

**Cloning Scheme:** 

<sup>\*</sup> The last codon before the Stop codon of the ORF.

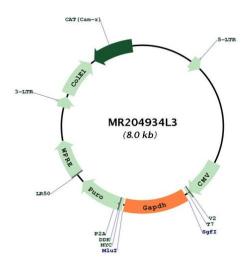

**OriGene Technologies, Inc.** 9620 Medical Center Drive, Ste 200

#### Plasmid Map:

**ACCN:** NM\_008084

ORF Size: 999 bp

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 008084.2</u>, <u>NP 032110.1</u>

RefSeq Size: 1444 bp RefSeq ORF: 1002 bp

### Gapdh (NM\_008084) Mouse Tagged Lenti ORF Clone - MR204934L3

 Locus ID:
 14433

 UniProt ID:
 P16858

 Cytogenetics:
 6 59.32 cM

**Gene Summary:** This gene encodes a member of the glyceraldehyde-3-phosphate dehydrogenase protein

family. The encoded protein has been identified as a moonlighting protein based on its ability to perform mechanistically distinct functions. The encoded protein was originally identified as a key glycolytic enzyme that converts D-glyceraldehyde 3-phosphate (G3P) into 3-phospho-D-glyceroyl phosphate. Subsequent studies have assigned a variety of additional functions to the protein including nitrosylation of nuclear proteins, the regulation of mRNA stability, and acting as a transferrin receptor on the cell surface of macrophage. Alternative splicing results in multiple transcript variants. Many pseudogenes similar to this locus are found throughout

the mouse genome. [provided by RefSeq, Jan 2014]
