

# **Product datasheet for MR205219L4**

### Tusc3 (NM\_030254) Mouse Tagged Lenti ORF Clone

### **Product data:**

**Product Type:** Expression Plasmids

Product Name: Tusc3 (NM\_030254) Mouse Tagged Lenti ORF Clone

Tag: mGFP Symbol: Tusc3

**Synonyms:** AU022242; BC003311; N33

Mammalian Cell Puromycin

Selection:

**Vector:** pLenti-C-mGFP-P2A-Puro (PS100093)

E. coli Selection: Chloramphenicol (34 ug/mL)

**ORF Nucleotide** The ORF insert of this clone is exactly the same as(MR205219).

Sequence:

Restriction Sites: Sgfl-Mlul

**Cloning Scheme:** 

<sup>\*</sup> The last codon before the Stop codon of the ORF

**ACCN:** NM\_030254

ORF Size: 1044 bp

**OriGene Technologies, Inc.** 9620 Medical Center Drive, Ste 200

#### Tusc3 (NM\_030254) Mouse Tagged Lenti ORF Clone - MR205219L4

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

**RefSeq:** <u>NM 030254.3</u>

 RefSeq Size:
 1527 bp

 RefSeq ORF:
 1044 bp

 Locus ID:
 80286

 UniProt ID:
 Q8BTV1

Cytogenetics:

**Gene Summary:** Acts as accessory component of the N-oligosaccharyl transferase (OST) complex which

catalyzes the transfer of a high mannose oligosaccharide from a lipid-linked oligosaccharide

donor to an asparagine residue within an Asn-X-Ser/Thr consensus motif in nascent

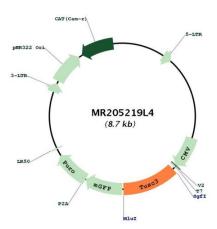

polypeptide chains. Involved in N-glycosylation of STT3B-dependent substrates. Specifically required for the glycosylation of a subset of acceptor sites that are near cysteine residues; in this function seems to act redundantly with MAGT1. In its oxidized form proposed to form transient mixed disulfides with a glycoprotein substrate to facilitate access of STT3B to the unmodified acceptor site. Has also oxidoreductase-independent functions in the STT3B-containing OST complex possibly involving substrate recognition.[UniProtKB/Swiss-Prot

Function]

8 A4
