

Product datasheet for MR205376L3V

Nf2 (BC005442) Mouse Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles Product Name: Nf2 (BC005442) Mouse Tagged ORF Clone Lentiviral Particle Symbol: Nf2 merlin Synonyms: **Mammalian Cell** Puromycin Selection: pLenti-C-Myc-DDK-P2A-Puro (PS100092) Vector: Tag: Myc-DDK BC005442 ACCN: ORF Size: 1059 bp The ORF insert of this clone is exactly the same as(MR205376). **ORF** Nucleotide Sequence: **OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info **OTI** Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. **RefSeq:** BC005442, AAH05442 **RefSeq Size:** 2127 bp **RefSeq ORF:** 1061 bp Locus ID: 18016 Cytogenetics: 11 3.0 cM

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

GRIGENE Nf2 (BC005442) Mouse Tagged ORF Clone Lentiviral Particle – MR205376L3V

Gene Summary:Probable regulator of the Hippo/SWH (Sav/Wts/Hpo) signaling pathway, a signaling pathway
that plays a pivotal role in tumor suppression by restricting proliferation and promoting
apoptosis. Along with WWC1 can synergistically induce the phosphorylation of LATS1 and
LATS2 and can probably function in the regulation of the Hippo/SWH (Sav/Wts/Hpo) signaling
pathway. May act as a membrane stabilizing protein. May inhibit PI3 kinase by binding to
AGAP2 and impairing its stimulating activity. Suppresses cell proliferation and tumorigenesis
by inhibiting the CUL4A-RBX1-DDB1-VprBP/DCAF1 E3 ubiquitin-protein ligase complex (By
similarity). Plays a role in lens development and is required for complete fiber cell terminal
differentiation, maintenance of cell polarity and separation of the lens vesicle from the
corneal epithelium.[UniProtKB/Swiss-Prot Function]
